<b>Office Action Summary</b>	<b>Application No.</b> 09/777,920	<b>Applicant(s)</b> DUMAS ET AL.	
	<b>Examiner</b> Rita J. Desai	<b>Art Unit</b> 1625	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 2, 4, 5, 12, 15, 16, 25, 27, 34-37, 39, 40, 42 and 45-47 are now pending in the application.

#### **Objection:-**

Applicants have listed claims 13 and 14 as pending , however they are cancelled in the claim set.

The rejection under 35 USC 112 over claim 36 has been withdrawn as applicants do have some data for the colorectal cancer, in the specifications.

The rejection of the claims under 35 USC 103 over Atwal however still stands.

Applicants argue that the substitution is on another ring . However the examiners position is that these compounds appear to have the same utility and in view of KSR , there is clear motivation to move the same substituent from one to the other phenyl. Especially so when Atwal discloses a broad genus, wherein X can be a bond or an O and R1 can be an aryl which may be substituted. See column 2 for the definition of aryl.

So when the teaching is there that it can be substituted , one of skill in the art would be motivated to make different positional substituted compounds. Besides applicants various examples made in the tables do not disclose any compounds wherein B is a pyridyl and L' is substituted by - COR<sub>x</sub>.

Thus the rejection is maintained.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2, 33, 35 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 21 of U.S. Patent No. 7371763. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to the same core and read on the same compounds, where B is a quinolinyl, isoquinolinyl (substituted or unsubstituted, and M is O, L is a Phenyl and L' is a phenyl or a pyridyl substituted by CORx.

Claims 35 and 36 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 22, 23 of U.S. Patent No. not yet issued but allowed US application 11/932269. Although the conflicting claims are not identical, they are not

patentably distinct from each other because These are also drawn to treating carcinoma of the colon.

***Conclusion***

Claims 2, 4, 5, 12, 15,16, 25, 27, 34-37, 39, 40, 42 and 45-47 stand rejected.
